LOAD DIAGRAM

LOAD DIAGRAM: This diagram illustrates the permissible uniformly distributed horizontal loads applied to multiple supports. They comply with IEC 61537 with connection to 1/5 of the span and the end span = 0.8x the span.

F = max. admissible load (daN/m)

L = support distance (m)

Max. deflection (m) $\equiv 1/100$

CHARACTERISTICS

- lightweight
- strong
- rounded tubular side-walls eliminate the risk of cable damage
- hot-dip galvanised as standard
- wrap around joiners with pre-assembled tap bolts ensure a fast secure connection
- rungs are perforated to enable efficient attachment of cables.
- partition (ZMSLOS35) can be fixed to the cable ladder with a sliding nut (GM6) and pan head bolt (HDRB6.10).

TECHNICAL INFORMATION

- Side walls are constructed from tubular section 60 mm x 15 mm.
- C-rungs are fixed at 250 mm intervals.
- Rungs are welded to the side wall of the cable ladder.
- Rungs are alternately placed with openings upwards and downwards.
