PRODUCT DATASHEET

KBS110.6 Perforated cable tray

Fix with:

Joiner for KBS110.6 KPW

Toothed round head bolt / flange nut VM

Joiner V110.200 Joiner for KBS110.6 KPW Alternative perforation Return flanges Support distance up to 6 meter

Standard finish			Pre-galvanised							
Optional finish				Hot-dip galvanised

LOAD DIAGRAM

This diagram illustrates the permissible uniformly distributed loads applied to multiple supports. They comply with IEC 61537 with connection in the centre of the span and the end span = 0.8×10^{-10} x the span. For widths of 300 mm and up, it is advised to use a stiffening plate. For span distances > 4 meters, couple the cable trays with KPW.

F = max. admissible load (daN/m) L = support distance (m) Max. deflection (m) = L/100

CHARACTERISTICS

Embedded perforations for:

- extra load capacity
- better aeration
- better stability
- better condensation drainage

Alternative perforations for:

- better fixing to supports
- very useful for attaching cables.

TECHNICAL INFORMATION

The perforation scheme differs according to the width. Alternative perforation beginning at 200 mm. Round holes of \emptyset 16 mm and \emptyset 19.5 mm provided as opening for the fitting of a gland.
